Portfolio

Mechanical Engineering Graduate | CATIA V5 | Automotive R&D | NPD | Product Design

Madurai, Tamil Nadu | 6374234018 | gokulanandhj7@gmail.com | linkedin.com/in/gokul-anandh-j

PROFESSIONAL SUMMARY

Mechanical Engineering graduate with a 7.93 CGPA and strong proficiency in CATIA V5, SolidWorks, and AutoCAD, seeking an entry-level opportunity in Automotive R&D, New Product Development (NPD), or Product Design. Skilled in 3D part modeling, assembly design, surface modeling, sheet metal design, engineering drafting, Digital Mock-Up (DMU), BOM creation, motion analysis, and CAD-based design analysis. Applied CAD skills through automotive component and complex mechanical assembly projects, with focus on design accuracy, manufacturability, integration, documentation, and continuous improvement.

TECHNICAL SKILLS

CAD Software	CATIA V5, SolidWorks, AutoCAD
CATIA V5	Part Design, Generative Shape Design (GSD), Assembly Design, Drafting, Sheet Metal Design, Digital Mock-Up (DMU)
Mechanical Design	2D Sketching, 3D Part Modeling, Assembly Design, Surface Modeling, Sheet Metal Design, Mold Tooling Design
Engineering	Engineering Drawing, BOM Creation, Engineering Documentation, Layout Creation & Updating, Motion Analysis
Analysis	CAD-Based FEA & CFD
Product Development	Automotive Component Design, Design Development, Assembly Integration, Design Validation
Documentation	MS Excel, MS Word, MS PowerPoint

CORE COMPETENCIES

Automotive Product Design & Development • New Product Development (NPD) • Mechanical Design & 3D CAD Modeling • CATIA V5 Part & Assembly Design • Surface & Sheet Metal Modeling • Digital Mock-Up & Assembly Integration • Engineering Drafting & Documentation • BOM Creation & Management • Layout Creation & Updating • Design Analysis & Validation • Engineering Problem Solving • Continuous Improvement

PROJECTS

Automotive Component Design — CATIA V5

- Designed 3D CAD models of automotive components including hood, bumper, door, and tailgate.
- Used CATIA V5 for part modeling, assembly development, surface modeling, and engineering drafting.
- Developed component assemblies to understand product integration and design relationships within automotive systems.
- Applied CAD design practices with focus on accuracy, manufacturability, component integration, and engineering documentation.

V6 Engine Assembly — SolidWorks

- Developed detailed 3D models and assembly structure of a V6 engine using SolidWorks.
- Integrated multiple mechanical components using assembly constraints and component-level modeling techniques.
- Strengthened understanding of complex mechanical systems, assembly relationships, and product visualization.

Fighter Jet Modeling — SolidWorks

- Developed a detailed fighter aircraft 3D assembly using SolidWorks with multiple integrated components.
- Applied advanced 3D modeling and assembly techniques for complex geometry and large-assembly visualization.

EDUCATION

B.E. — Mechanical Engineering	CGPA: 7.93 / 10
SBM College of Engineering and Technology, Dindigul	2026
HSC	61.17%
Government Boys Higher Secondary School, Vadipatti, Madurai	2022
SSLC	52.4%
MVM Kalaivani Matric Hr. Sec. School, Sholavandan	2020

CERTIFICATIONS

CATIA V5 — CAD & Mechanical Design • SolidWorks — 3D Modeling & Assembly Design • AutoCAD — Engineering Drawing & Drafting

PROFESSIONAL STRENGTHS

Automotive R&D and NPD interest • Fast learner and adaptable to engineering tools • Analytical mechanical design approach • Detail-oriented CAD modeling and documentation • Strong ownership of assigned responsibilities • Continuous technical and professional development

LANGUAGES

Tamil | English
